Docket No.

6460-41

Per our phone conversation today, September 16, 2004, attached to this coversheet are the papers that were filed on March 15, 2004 for the above mentioned case. Please find attached the Transmittal Letter, Postcard, Response, Petition for Retroactive Extension of Time, and original office action. Please let us know when you have received this fax and what our next course of action should be.

Regards,
Gail Ochocki
Secretary to Nicholas A. Zachariades

DETAILED ACTION

- I. The location of your application in the PTO has changed. To aid in correlating any papers for this application, all further correspondence regarding this application should be directed to Art Unit 1644, Group 1640, Technology Center 1600.
- II. Claims 1-43 are pending.

Election/Restrictions

- III. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - Claims 2-8, drawn to a method for detecting a cancer in a brain tissue by analyzing the brain tissue sample for a VEGF-D nucleic acid marker using VEGF-D nucleic acid, or INA, classified in Class 435, subclass 6.
 - Claims 9-18, drawn to a method for detecting a cancer in a brain tissue by analyzing the brain tissue sample for a VEGF-D protein marker using a probe that specifically binds to the VEGF-D protein, a probe that is a VEGF-D antibody, classified in Class 435, subclass 7.1.
 - 3. Claims 19-22, drawn to a method of modulating VEGF-D gene expression in a brain cancer cell using oligonucleoide, antisense oligonucleotide, classified in Class 536, subclass 24.5; Class 514, subclass 44.
 - 4. Claims 26-28, drawn to a method of identifying a test compound that modulates expression of VEGF-D gene in a brain cancer cell by detecting VEGF-D nucleic acid marker in the cell, classified in Class 435, subclass 6, and 7.23.
 - 5. Claims 29-32, drawn to a method of identifying a test compound that modulates expression of VEGF-D gene in a brain cancer cell by detecting VEGF-D protein marker in the cell, classified in Class 435, subclass 7.1, and 7.21.

Application/Control Number: 10/075,823

Art Unit: 1644

Page 3

6. Claims 33-43, drawn to a method of inhibiting angiogenesis associated with a brain cancer in a subject by administering a molecule to the central nervous system wherein the molecule is an antibody, classified in Class 424, subclass 130.1.

Linking claim 1 will be examined along with Group 1, claims 2-8 or Group 2, claims 9-18.

Linking claims 23-25 will be examined along with Group 4, claims 26-28 or Group 5, claims 29-32.

The inventions are distinct, each from the other because of the following reasons:

Inventions of Groups 1-6 are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case, the methods as claimed using distinct products such as nucleic acid and antibody differs with respect to their method steps and therapeutic endpoints. Therefore, they are patentably distinct.

- IV. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification and/or recognized divergent subject matter. Further, even though in some cases the classification is shared, a different field of search would be required based upon the structurally distinct products recited in the various methods comprising the distinct method steps. Further, a prior art search also requires a literature search. It is an undue burden for the examiner to search more than one invention. Therefore restriction for examination purposes as indicated is proper.
- V. Applicant is advised that the response to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed.
- VI. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Phuong Huynh "NEON" whose telephone number is (571) 272-0846. The examiner can normally be reached Monday through Friday from 9:00 am to 5:30 p.m. A message may be left on the examiner's voice mail service. If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Christina Chan can be reached on (571) 272-0841.

Application/Control Number: 10/075,823

Any inquiry of a general nature or relating to the status of this application should be directed to the Technology Center 1600 receptionist whose telephone number is (703) 308-0196.

VII. Papers related to this application may be submitted to Technology Center 1600 by facsimile transmission. Papers should be faxed to Technology Center 1600 via the PTO Fax Center located in Crystal Mall 1. The faxing of such papers must conform to the notice published in the Official Gazette, 1096 OG 30 (November 15, 1989). The CM1 Fax Center telephone number is (703) 872-9306.
